- SQL

## Awards Received

**P&G Moonshot Innovation Challenge, Procter & Gamble, Top Ten** (March 2018)

**Blue Hacks 2018, Computer Society of the Ateneo, Second Place** (January 2018)

## Projects

**Influenseer**, Node.js/Express – P&G: Moonshot 2018 application that predicts micro influencers on Twitter and Instagram. Handled the server-side and API handling of the application.

**RubShop**, Ruby on Rails - BlueHacks 2018 application, made under 24 hours a B2C application that promotes sustainable and zero-waste products.

**The Craft Central Integrated Consignment System**, Ruby on Rails – A web-based app that keeps track of The Craft Central's office inventory and consignment stores' inventory and generates reports.

**Point of Sale System**, Ruby on Rails – Final Project for Introduction to Applications Development class served as the group's lead developer.

**Async Blog**, Node.js/Express – My first excursion with Node.js. Created a single page blog application that does not reload.
